

LIEBERT LEARNING CENTER

westerville, ohio

The Liebert Learning Center in Westerville, OH was built to provide training for customers, partners, Engineers and employees of the Emerson Network Power. The 69,965 square foot facility provides training for more than 1800 students per year. StonePly provided exterior Indiana Limestone Panels on both the North and South elevations. StonePly was able to meet the customer's needs by furnishing custom returns at all the windows and prefinished corners. Installation of the stone panels was completed on time by Karst and Sons Masonry, Inc using z-clip extrusions and in field attachment.
